Results	1
5-year self-harm or hospitalization	
The tables in this section contain performance for estimating the marginal odds ratio (mOR) using plasmode simulation.	

#### Results

5-year self-harm or hospitalization

Table 1: Plasmode data simulation: 5-year self-harm or hospitalization, regression functions are glms, oracle marginal odds ratio (mOR). Relative performance of estimators with sample size n = 50,337 and 1000 simulation replications. The value of the estimand is -0.189. ESE = empirical standard error, ASE = asymptotic standard error, MAD = mean absolute deviation, RMSE = root mean squared error, rRMSE = robust RMSE (using median bias and MAD), Oracle coverage = coverage of a confidence interval based on the ESE, Nominal coverage = coverage of a confidence interval based on the ASE.
